# Sustainable Development: World and India Perspective

# Content Layout Unit 1

## Introduction to Sustainable Development:

- Need and Importance of Sustainable Development
- Historical & Policy perspectives of Sustainable Development
- **Sustainable Development: World and India Perspective**

*A glance at the 2023 Global  
Sustainable Development  
Draft Report*

**United Nations**

Department of  
Economic and  
Social Affairs

## **Virtual Dialogue on The 2023 Global Sustainable Development Report (GSDR) between the Independent Group of Scientists (IGS) and Private Sector Representatives**

**3 March 2023, 10:00 – 11:30 a.m. EST**

# CONTEXT

- We are in the Anthropocene... → social vulnerability.
- In the 2020s → Multiple Compounding Global Risks: climate change, biodiversity loss, geopolitical conflict, financial instability, COVID19 and natural disasters  
→ *Escalating social vulnerability.*

IGS 2023 wanted to...

- Keep a Focus on *the*  *INTEGRATED perspective* of SDGs to avoid trade-offs and international spillovers
- Use Theory of Change that could help accelerate actions at key phases. 

.... *sense of urgency AND a sense of hope*

## POTENTIAL FOR MEETING SDGs BY 2030 BASED ON TRENDS IN SELECT TARGETS

### DIRECTION OF MOVEMENT

- Substantial progress/on track
- Fair progress but acceleration needed
- Limited or no progress
- Deterioration

Half-way to 2030 –  
World Progress Towards  
the Sustainable  
Development Goals

# The Sustainable Development Goals Report 2023: Special edition

Towards a Rescue Plan for People and Planet

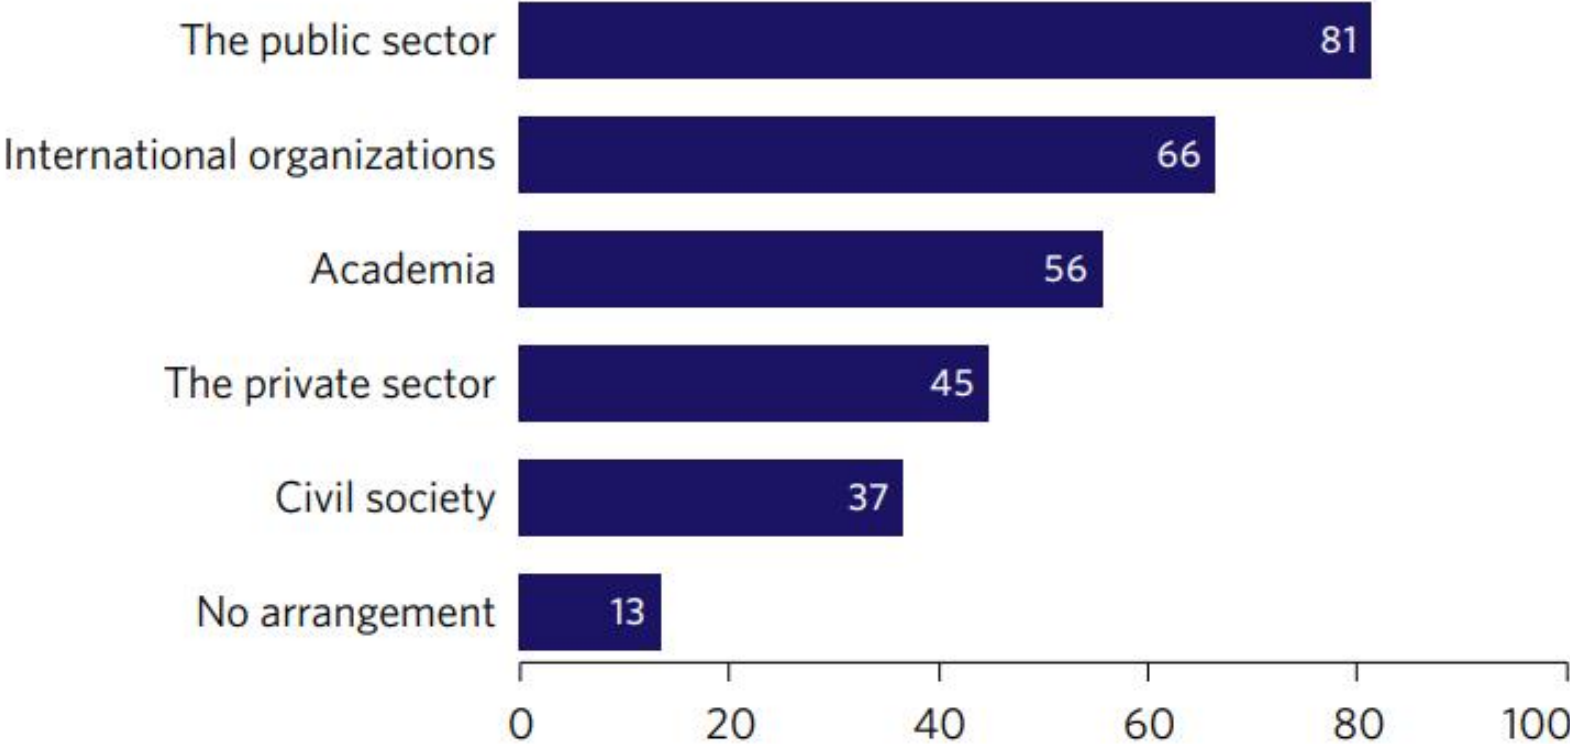

Progress assessment for the 17 Goals based on assessed targets, 2023 or latest data (percentage)

# Important partnerships are being established for better and more inclusive data for development

**Proportion of national statistical offices with institutional arrangement with stakeholders (percentage)**

# SDG PROGRESS UNVEILED: A DATA JOURNEY

## A CONCERNING PICTURE OF SDG PROGRESS AT THE MIDPOINT:

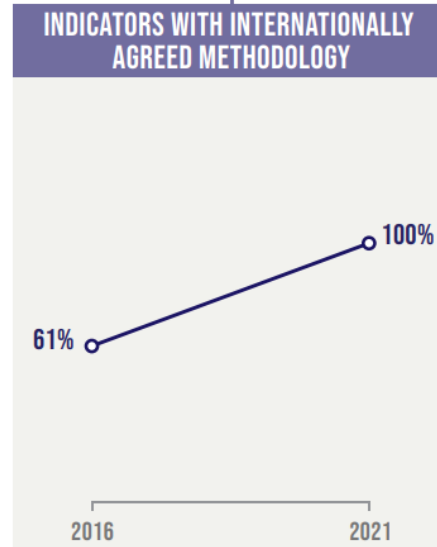

- ON TRACK
- MODERATELY OR SEVERELY OFF TRACK
- STAGNATION OR REGRESSION

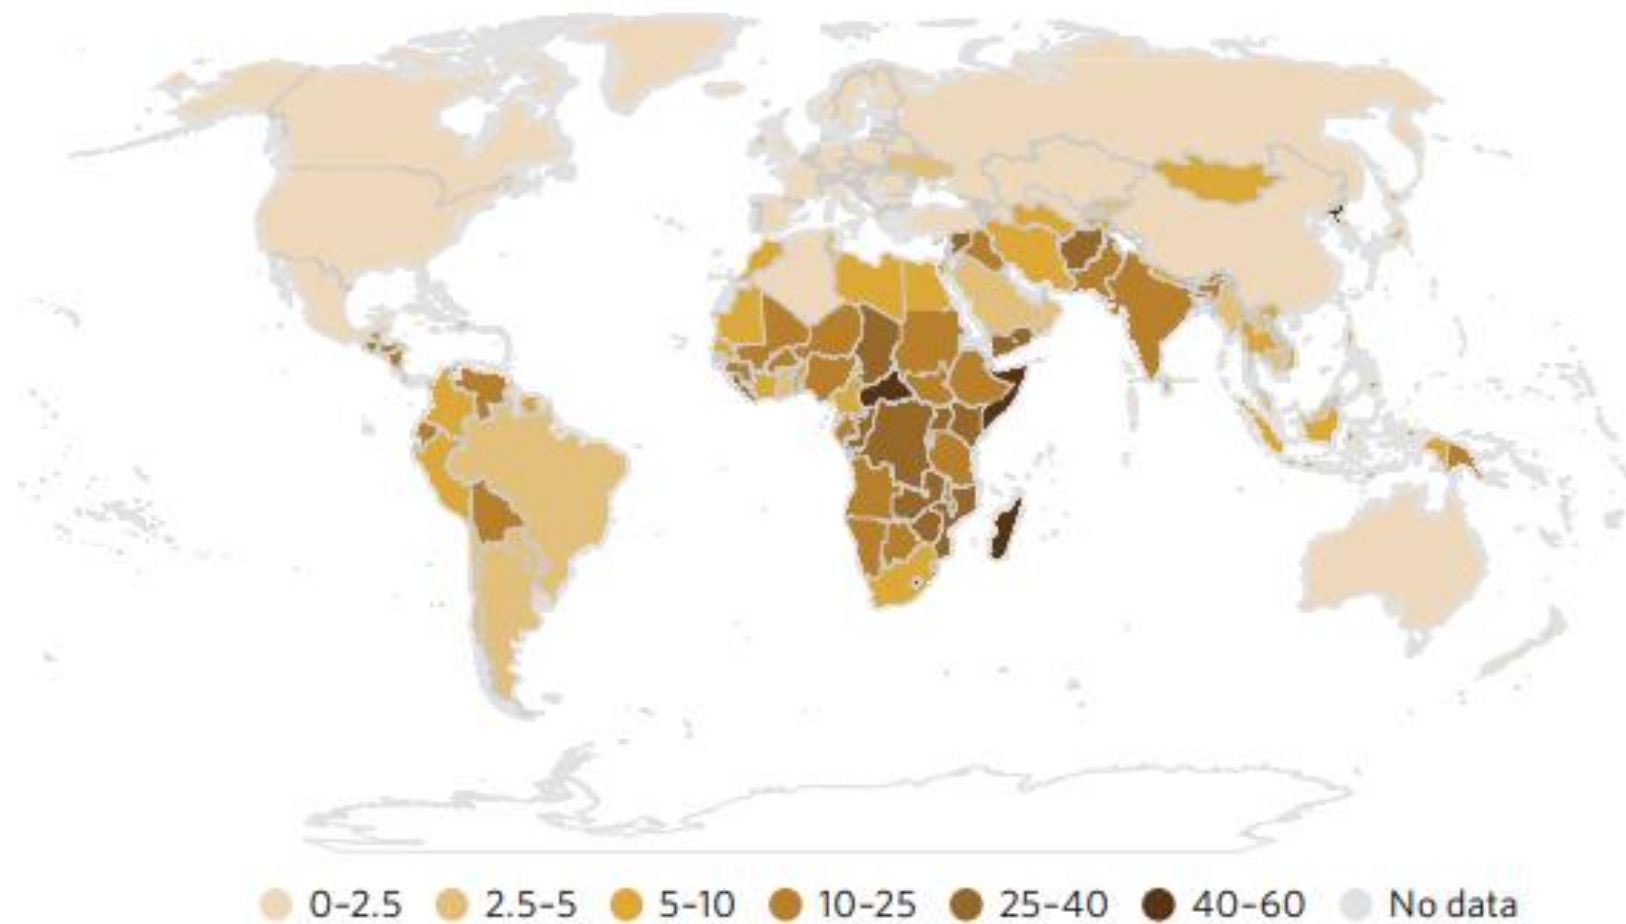

BASED ON AN ASSESSMENT OF SDG TARGETS WITH TREND DATA.

## SIGNIFICANT STRIDES IN SDG DATA AND MONITORING

## Prevalence of undernourishment, 2020-2022 average (percentage)

# Transformative change and key interventions

- Universal health coverage, doubled health budgets
- Universal social insurance, double R&D budgets
- Public procurement for sustainable diets, green fertilizer mandate
- Carbon pricing
- Public transport investment, access to basic services
- Payment for nature-based solutions, secure land tenure, metrics beyond GDP
- Take an integrated and dynamic approach

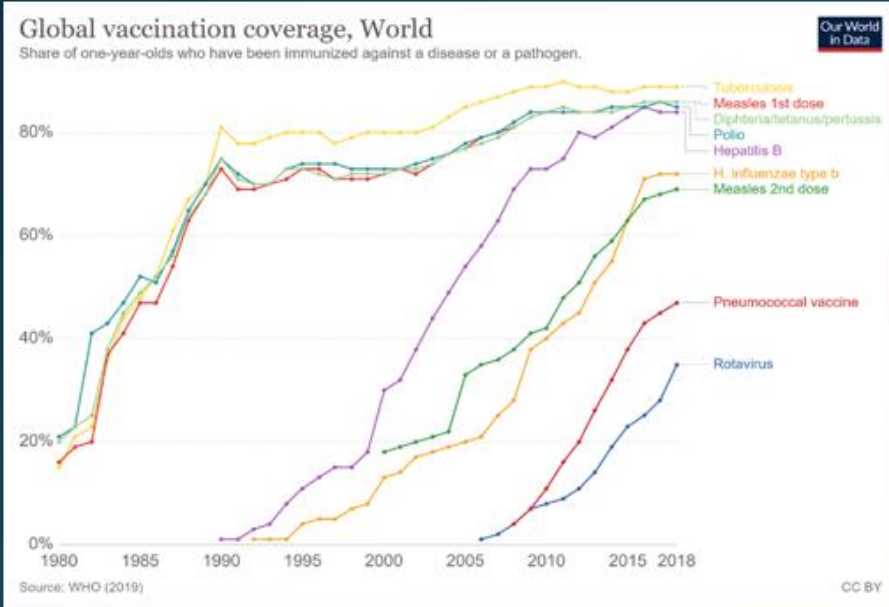

# Chapter 3: Accelerating Transformations to SDGs

Can we strategically enable SDG solutions to move from emergence to acceleration to stabilization – tracing an S-curve?

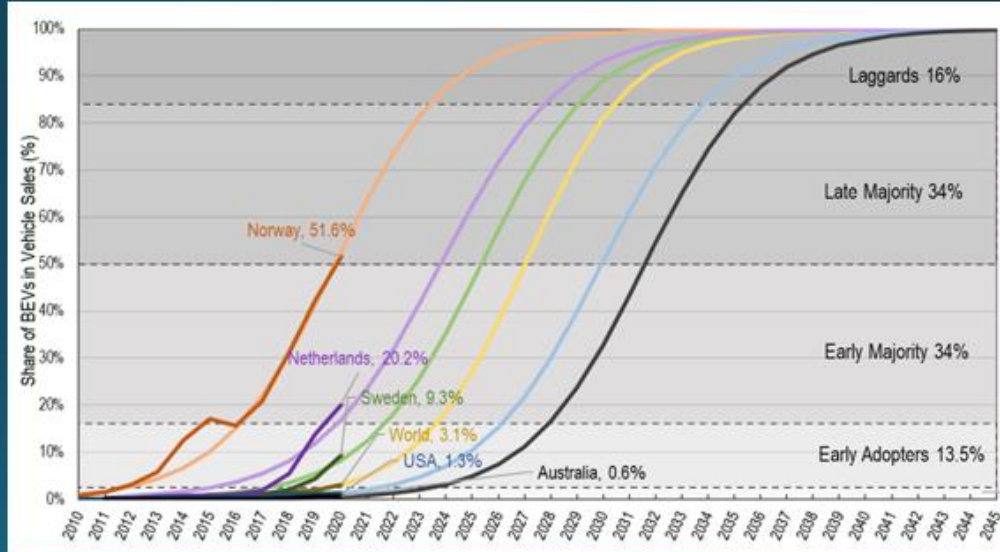

# Examples of s-curves - Technological, social and policy innovations

## Vaccine coverage

## Share of electric vehicles

# 4: Transformations Through Science

- “Science lies at the heart of sustainable development” -> GSDR 2019
- BUT we know a lot already, how can society – including scientists –speak more convincingly to government– to inspire bold decisions - to use the power of science and technology as an effective lever for starting, accelerating and stabilizing transformation.

# World Status on SDG

- According to the report, the **impacts of the climate crisis, the war in Ukraine, a weak global economy, and the lingering effects of the COVID-19 pandemic** have revealed weaknesses and hindered progress towards the Goals.
- The report further warns that while lack of progress is universal, it is the **world's poorest and most vulnerable** who are experiencing the worst effects of these unprecedented global challenges.
- It also points out areas that need urgent action to rescue the SDGs and deliver meaningful progress for people and the planet by 2030.

***"Unless we act now, the 2030 Agenda will become an epitaph for a world that might have been."***

## **World leaders should come together at the SDG Summit to deliver a rescue plan for people and planet centred around the following three major breakthroughs:**

**Equipping governance and institutions for sustainable and inclusive transformation**

**Prioritizing policies and investments that have multiplier effects across the goals**

**Securing a surge in Sustainable Development Goals financing and an enabling global environment for developing countries**

**India, home to one-sixth of all  
humanity, holds the key to the success  
of the 2030 Agenda**

# Our Work on the Sustainable Development Goals in India

# Sustainable Development in Indian Perspective

- In 1972, the then Prime Minister of India, Mrs. Indira Gandhi emphasized, at the UN Conference on Human Environment at Stockholm,
- The removal of poverty is an integral part of the goal of an environmental strategy for the world.
- The concepts of interrelatedness, of a shared planet, of global citizenship, and of 'spaceship earth' cannot be restricted to environmental issues alone.

# The Sustainable Development Goals in India

**NITI Aayog**

- At the UN Sustainable Development Summit in 2015, Prime Minister Narendra Modi noted,
- ***“Sustainable development of one-sixth of humanity will be of great consequence to the world and our beautiful planet. It will be a world of fewer challenges and greater hope; and, more confidence of its success”.***
- NITI Aayog, the Government of India’s premier think tank, has been assigned with the task of coordinating the SDGs, mapping schemes related to the SDGs and their targets,

Website: <https://niti.gov.in/>

# The Sustainable Development Goals in India

- In addition, the **Ministry of Statistics and Programme Implementation (MoSPI)** has been leading discussions for developing national indicators for the SDGs.
- State governments are key to India's progress on the SDGs as they are best placed to **'put people first'** and to ensure that **'no one is left behind'**.
- The UN Country Team in India supports NITI Aayog, Union ministries, and state **governments** in their efforts to address the interconnectedness of the goals,

# The Sustainable Development Goals (SDGs) stand as a global roadmap

- These 17 interconnected goals encompass various aspects of societal progress, including eradicating poverty, ensuring quality education, promoting gender equality, fostering economic growth, and addressing environmental concerns.
- India's commitment to the SDGs is to integrate these goals into its national policies and plans.
- The country's approach involves not just acknowledging these goals but also formulating strategies to realize them.

# Perspectives and Approaches Towards Achieving A Sustainable Future:

- Poverty Eradication and Sustainable Livelihoods
- Changing Unsustainable Patterns of Consumption and Production
- Protecting and Managing the Natural Resource Base of Economic and Social Development
- Sustainable Development in a Globalizing World
- Health and Sustainable Development

# Ranking of India in SDG

<https://dashboards.sdgindex.org/rankings>

Rank	Country	Score	Performance by SDG
1	 Finland	86.76	
2	 Sweden	85.98	
3	 Denmark	85.68	

- According to the United Nations SDG Index and Dashboards Report 2023, which assesses countries' progress towards the Sustainable Development Goals (SDGs),
- the SDG Index Rank of India is 112 out of 166 countries, with an overall index score of 63.5 percent and spill-over score of 99.4 percent.

SUSTAINABLE DEVELOPMENT REPORT						
Chapters Rankings Interactive Map Country Profiles Data Explorer Downloads & Materials						
109	 Namibia	64.28				
110	 South Africa	64.00				
111	 Bahrain	63.74				
112	 India	63.45				
113	 Gabon	63.09				

# Sustainable Development Goals (SDGs): Notable Achievements in India

- **Goal 1: No Poverty:** India has successfully lifted millions of people out of poverty, reducing the poverty rate from 45% in 1993 to around 21% in 2011.
- **Goal 2: Zero Hunger:** The prevalence of undernourishment in India has decreased from 18.2% in 2004-2006 to 14.5% in 2016-2018.
- **Goal 3: Good Health and Well-being:** India has made significant improvements in maternal and child health, with a reduction in maternal mortality ratio from 254 per 100,000 live births in 2004-2006 to 113 in 2016-2018. Under-five mortality rate has also declined

# Sustainable Development Goals (SDGs): Notable Achievements in India

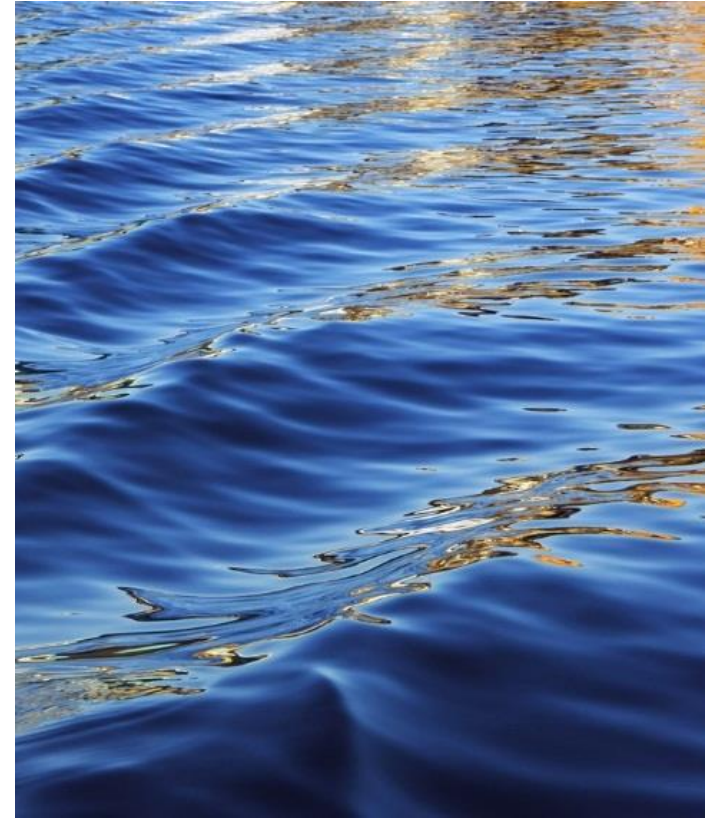

- **Goal 4: Quality Education:** India has achieved near-universal primary school enrolment, with a net enrolment rate of 98.3% in 2018.
- **Goal 5: Gender Equality:** The female labour force participation rate in India increased from 22.5% in 2005 to 23.3% in 2019. The child marriage rate declined from 47% in 2005-2006 to 30% in 2015-2016.
- **Goal 6: Clean Water and Sanitation:** Access to improved drinking water sources has increased from 73% in 1990 to 94% in 2017. Access to improved sanitation facilities has also improved, rising from 21% in 1990 to 71% in 2017.labor

**“The earth has enough  
for everyone’s need  
but not for  
anyone’s greed.”**

**Mahatma Gandhi**
